## **MENTIS INTERNATIONAL ANNOUNCES SILK DESIGNER™ AUTHORIZING TOOL**

GREENWOOD VILLAGE, Colo. (June 5, 2008) Mentis International Corporation announces the release of Silk Designer™, a desktop graphic user interface (GUI) allowing non-developers to author Silk™ screens and animate widgets. Designed for use by sales, marketing, and programming departments, Silk Designer facilitates rapid screen development and experimentation without programmer assistance.

### **Silk Designer features**

- Drag and drop to connect widgets to screens
- Click and select to adjust fonts, sizes, colors, and images
- Click and select to bind keys to animations
- Authoring templates to enforce site-wide consistency
- Standard Silk widgets and animations OR extend the experience by plugging in your own widgets, animations, and data sources
- Features allowing you to test animations and screen transitions on your desktop before exporting and compiling them to the set-top or mobile device

### **SILK Designer includes**

- WYSIWYG Silk authoring environment
- Load/Save XML capabilities
- Export to Java Standard Edition (SE) code generator for set-tops
- Export to Java Micro Edition (ME) code generator for mobile devices\*
- Built-in screen simulator
- Silk Animation Engine framework

Silk Designer 1.2 is available immediately for Windows, Mac, and Linux desktops. Contact Mentis for a FREE developer's license, available for prequalified customers.

### **About Mentis**

Mentis International Corporation is a middleware solutions provider for the cable and telecommunications industry, providing legacy system integration and open system infrastructure to support broadband, video, data, and voice services. A leading integrator for order entry, billing, workforce, customer care, provisioning, workflow, and inventory systems, Mentis provides solutions to automate key internal sales and service delivery processes, enabling our clients to manage complex third-party business relationships and reach out directly to the customer.
